# AVIA TION

## In a hub that's in high demand for the high-tech and aviation industries because of:

Myrtle Beach International Technology & Aerospace Park (iTAP): The new 460-acre industrial park at Myrtle Beach International is adjacent to one of the East Coast's longest runways at 9,500 feet.

iTAP is all-digital, with an IP-based network anchored by a high-tech fiber communications infrastructure and a state-of-the-art land plan to maximize productivity and innovation.

iTAP is within walking distance to the 160-acre upscale, urban village of The Market Common, making the work and living environment around it one of a kind.

**Myrtle Beach International services more than 120 commercial flights a day via nine carriers, with nonstop service to more than 28 markets and a convenient connection away from most of the U.S., eastern Canada, the Caribbean and Central America.**

Myrtle Beach International recently completed a new 11,000-square-foot General Aviation terminal and is currently undergoing a \$130 million terminal expansion project.
